Mohamed Ibrahim

Flutter Developer

Mansoura, Egypt | 01500950666 | m7mdibrahiim7@gmail.com | LinkedIn | GitHub | Behance

PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience delivering mobile, web, and Windows applications across e-commerce, education, repair operations, services, fitness, inventory, and invoicing. Builds responsive interfaces, maintainable architectures, REST/Firebase/Supabase integrations, payments, local-data workflows, QR and barcode flows, and production-style printing experiences. Experienced with Provider, Bloc, Agile collaboration, and reusable Flutter components.

TECHNICAL SKILLS

Flutter & Architecture: Flutter, Dart, Responsive UI, Clean Architecture, MVVM, Repository Pattern, Reusable Widgets, Performance Optimization
State Management: Provider, Bloc
Backend & Data: REST APIs, Firebase, Supabase, SQLite, sqflite_common_ffi, Hive, shared_preferences, Secure Local Storage
Desktop, Printing & Hardware: Flutter Windows, PDF Generation, Printing, Bluetooth Thermal Printing, Windows Raw Printing, Barcode and QR Workflows
Integrations: Paymob, Stripe, PayPal, Customer Tracking Links, Vercel Status-Page Workflow, Gemini-Assisted Image Analysis
Tools & Delivery: Git, GitHub, JSON, Agile, Scrum

PROFESSIONAL EXPERIENCE

Flutter Developer — GROZA **Aug 2025 – Present**

- Develop Flutter products including Dr. Yasmeen Pharmacy, Trelixi Learning, Kanzoon, Fitness App, and an educational platform.
- Build responsive interfaces and integrate APIs and Firebase services including Authentication, Firestore, and Storage.

Flutter Developer — Tawr Company **Aug 2024 – Jul 2025**

- Developed service, gold-price, medical-prescription, electronic-invoice, and internal Flutter applications.
- Integrated secure APIs and local storage with SQLite and Hive; applied Clean Architecture and MVVM.
- Collaborated with designers and backend teams through Agile workflows.

Flutter Developer — Fastweb Company **Feb 2024 – Jul 2024**

- Developed cross-platform Flutter applications and integrated REST APIs and Firebase services.
- Used Provider and Bloc to manage state, reduce unnecessary rebuilds, and support reusable responsive UI components.

Flutter Developer — Freelance **2022 – 2024**

- Built e-commerce, education, services, fitness, and Windows applications with responsive UI, APIs, admin dashboards, and payment integrations.
- Worked with Firebase Authentication, Firestore, Realtime Database, Storage, and custom UX animations.

SELECTED PROJECTS

Al Raqi Mobile — Repair Center Management System

- Developed a cross-platform Flutter solution for mobile-device repair operations using Provider, GoRouter, and Supabase, with role-based access for administrators, staff, engineers, and read-only users.
- Implemented end-to-end workflows for customer/device intake, multi-device batches, repair and parts tracking, technician management, inventory, returned devices, financial adjustments, audit logs, and end-of-day reporting.
- Added public QR tracking, customer messaging, image attachments, AI-assisted device identification, Bluetooth/PDF receipt printing, and backup/restore workflows.

Game Zone — Gaming Console Service Center Management

- Built a Flutter Windows application for managing PlayStation and Xbox repair operations using Provider, GoRouter, and SQLite with an offline desktop workflow.
- Implemented repair intake and lifecycle tracking, console-specific device details, inventory and parts, warranty handling, stock alerts, revenue dashboards, and backup/restore.
- Added QR-based customer status tracking through a public web page, plus thermal receipt, PDF, barcode, and device-sticker printing using Bluetooth and native Windows printer integrations.

Dr. Yasmeen Pharmacy — Bilingual Pharmacy E-commerce

- Built a Flutter commerce experience with Firebase, Supabase, Arabic/English localization, dark/light themes, catalog search, favorites, cart, orders, and account settings.
- Integrated Paymob payment options for cards, e-wallets, and cash-based checkout flows.

Noga Mobile — Service Operations Workflow

- Built and presented an Arabic-first Flutter operations interface spanning work orders, customers, technicians, multi-step device intake, daily-session controls, inventory, finance, backups, and management dashboards.
- Created responsive mobile workflows and reusable operational surfaces while keeping private backend and release details undisclosed.

Sharks Academy — Courses & Exams App

- Developed an Arabic-first Flutter educational application for organizing courses, educational content, and examinations through a focused student experience.
- Implemented multi-step onboarding, login, detailed student registration, remember-me, and password-recovery flows, including guardian contact, school, grade, teacher, identity-document, and terms fields.
- Built a responsive localized UI system using Flutter ScreenUtil, Intl localization, Material 3, and reusable form components.

TargetX — Flutter E-commerce App

- Built API-driven catalog, category, offer, product-detail, favorites, cart, checkout, profile, and settings flows with responsive Flutter UI.
- Applied state management, Clean Architecture, reusable commerce components, animations, and performance-focused UX.

Trelixi Learning App

- Built an Arabic learning application for children aged 5–12 with five interactive levels covering roots, awareness, derivational patterns, morphology, and word usage.
- Implemented responsive UI, animations, audio feedback, activities, success states, and progress tracking.

A2H — Inventory & Invoicing App

- Built a Flutter inventory and invoicing application using Provider and Hive for local product persistence.
- Implemented product CRUD with purchase, wholesale, and selling prices, stock quantities, and automatic stock deduction with insufficient-stock validation during sales.
- Created fast sales and purchase invoice workflows with customer details, discounts, delivery charges, live totals, and Arabic PDF generation and printing.

Additional Projects: Farah Services, Education App, Cleany, Fitness App, Kanzoon, Rusheta Windows, Ahla Beauty, Gypsum Home, and other verified Flutter projects.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor's Degree in Computer Science — Misr Higher Institute for Commerce & Computers (M.E.T Academy)

2020 – 2024 | Mansoura, Egypt

Courses: Complete Flutter & Dart Development Course (Udemy); Flutter & Dart Development Course (Route); The Complete Flutter Development Guide (Udemy); Flutter & Firebase: Build E-commerce & Admin App [2024] (Udemy).
